

EVALUATION CRITERIA UB-AG-315:

A) FIRST STAGE

Main Criteria: 70%

1. Scientific leadership capacity and international projection.
2. Scientific general track. Objectives and goals achieved. Basic science background will be highly considered.
3. Originality and Quality of the scientific background, according to articles published in international journals. Special emphasis will be focused in their role as corresponding or as the first author. The role as editor of scientific books will be evaluated as well.
4. Long stays or contracts in foreign international scientific or academic institutions (outside of Spain).
5. Competitively financed scientific projects as a principal investigator.
6. Scientific collaborations with other international laboratories.
7. The contributions the candidates have made to innovative teaching tools.

Additional Criteria: 30%

- a) Membership in organizing committees of scientific meetings.
- b) Participation in scientific meetings, especially in symposia.
- c) Knowledge transfer: Patents.
- d) Membership of international scientific societies.
- e) Conferences or seminars in prestigious scientific centers.
- f) Honors and prizes.
- g) Experience on the supervision of doctorate thesis.
- h) Teaching experience in Histology in Medicine, Odontology and other allied Sciences.”
- i) Teaching experience in Master degrees.
- j) Experience in supervision on Master Thesis.
- k) Experience in supervision on Final Graduate Degrees Thesis.
- l) If any, reports of their teaching activity, especially students points of view.

B) SECOND STAGE

The second part will consist in a public session with an interview with the Committee during 1 hour and a half in which candidates must present a personal introduction highlighting their

scientific and teaching background followed by a short seminar of 30-40 minutes on their recent research and the future goals in the field of Medicine and Biomedical Sciences. The members of the Committee will ask the candidates any question related to the scientific presentation or any other issues that they consider relevant on the function of Associate Professor in Histology for the University of Barcelona.

In this second stage, in addition to the specific criteria already mentioned and contributed in the curriculum vitae, will be assessed the quality of the seminar taught and the activity that is planned to be developed; as well as the answers to the questions raised by the members of the Commission.
