

SERRA HÚNTER PROGRAMME SELECTION PROCESS

Profile: Psychology

Category: Tenure-eligible Lecturer

Department: Medicine

Faculty: Medicine and Health Sciences

Positions offered: 1 (code: UB-LE-525)

General assessment criteria for First and Second phases

1. Research: significance and impact of publications in the research field (50/100)

- Quality and originality of research work, scientific publications in indexed journals, ability for team working.
- Participation in competitive research projects.
- Quality of knowledge transfer (including patents and IP rights).
- Participations in congresses and conferences (talks, and posters).

2. Teaching experience (30/100)

- Graduate and post-graduate courses taught
- Supervision or co-supervision of students theses (Bachelor's, Master's).
- Supervision or co-supervision of PhD theses.
- Teaching quality and innovation (positive assessments of the candidate's work; teaching materials; innovative teaching projects, etc.).

3. International mobility and visibility (20/100)

- International PhD Education (e.g. with PhD training periods abroad).
- Postdoctoral periods outside Spain, particularly for those whose entire training was within Spain. (The call stipulates that at least two years away from the hiring university is a particularly relevant selection criteria).
- International training grants, awards or prizes, involvement in international networks, invited lectures and seminars at internationally renowned research centers.
- Familiarity with Spanish teaching and research organization, especially for those whose training and work experience has been outside Spain.

Second phase

The selection committee invites the candidates to structure their presentation time in three parts:

- 1). Presentation of intellectual journey (about 10 min)
- 2). Short lecture on their research (about 30 min)
- 3). Introduce their teaching approach (about 10 min)

The same criteria as in Phase 1 will be used, supplemented by an evaluation of the second phase in relation to the quality of the presentations, the research and teaching activities planned to be carried out at the Department, and the insight replies to questions raised by the panel during the discussion.

The expected dates of the second phase public session are for April 9-11th, 2019, yet they will be officially published at the end of Phase 1.

Barcelona, December 21st, 2018
